HARSHADA SANTOSH JADHAV

Los Angeles, CA | 323.354.0905 | jadhavharshadas.2599@gmail.com | linkedin.com/in/harshada-jadhav/

PROFESSIONAL SUMMARY

Data Analyst with 3+ years in healthcare analytics and production-scale ETL pipelines. Quantified $310K in revenue at risk through customer segmentation; reduced data processing delays by 40% across 100+ GB daily workflows. Proficient in Python, PySpark, SQL, Tableau, and Power BI, with hands-on experience in AWS (S3, Glue, RDS) and BigQuery.

SKILLS

- **Data Analysis & BI:** SQL (PostgreSQL, MySQL, BigQuery), Tableau, Power BI, Excel (Pivot Tables, DAX), EDA, Statistical Analysis
- **Programming:** Python (Pandas, NumPy, Matplotlib, Seaborn, scikit-learn), SQL, Git, Jupyter
- **Machine Learning:** Regression, Clustering, Churn Modeling (scikit-learn)
- **Data Engineering:** PySpark, Apache Spark, ETL/ELT Pipeline Design, Data Modeling, Data Warehousing, AWS (S3, Glue, RDS), GCP, BigQuery, API Data Extraction, Parquet/JSON Processing
- **Generative AI:** LLM Integration, Groq API, Prompt Engineering, Natural Language Data Querying, AI-Generated Data Analysis

EXPERIENCE

National Hispanic Health Research Institute (NHHRI) Feb 2026 – Present
Data Transformation Analyst Hartford, CT (Remote)

- Collected, cleaned, and integrated multi-source healthcare datasets (U.S. Census, CDC, federal data) covering 51 states from Excel/CSV formats using Python, SQL, and advanced Excel, improving data quality and consistency by ~30% for public health analysis.
- Processed and standardized 35K+ records on chronic conditions and demographic indicators, building analysis-ready datasets that reduced manual data preparation time by 35% and improved reporting accuracy.
- Designed and delivered interactive Tableau dashboards visualizing nationwide healthcare and demographic trends, enabling stakeholders to analyze state-level insights across 6 years of data and accelerating decision-making by nearly 45%.

Chicago Education Advocacy Cooperative (ChiEAC) Aug 2025 – July 2026
Data Scientist Chicago, IL (Remote)

- Analyzed customer churn behavior using Python-based KPI calculations, identifying a 19.7% churn rate and pinpointing bronze and silver tiers as highest-risk customer segments.
- Quantified $310K in revenue at risk by segmenting high-risk customers using service risk and customer value metrics, enabling targeted retention strategy recommendations.
- Delivered actionable KPI dashboards translating customer behavior data into retention strategies for business stakeholders.

Abzooba India Infotech Pvt. Ltd. Jun 2021 – Jun 2023
Big Data and Cloud Developer Pune, India

- Designed and maintained ETL/ELT pipelines processing 100+ GB of nested healthcare JSON data daily, transforming raw records into clean, structured formats for stakeholder reporting using Python, SQL, and PySpark.
- Improved data accuracy by 25% through root-cause analysis of transformation logic discrepancies, ensuring reliable outputs across production data warehousing workflows.
- Reduced data processing and reporting delays by up to 40% by optimizing Apache Spark job performance, minimizing data shuffling, and tuning distributed transformation workflows.
- Translated complex stakeholder requirements into PySpark data transformation logic; collaborated with QA and API teams to validate data quality against business specifications.
- Mentored 2 junior engineers in PySpark best practices and Agile (Scrum) workflows, accelerating team onboarding and improving data quality delivery across sprints.

PROJECTS

InsightAI – AI-Powered Data Analyst Agent
Python, Generative AI, Groq API, Pandas, Streamlit, Plotly Jul 2026

- Developed a Generative AI-powered data analytics application using Groq LLM API, Pandas, and Streamlit, enabling users to upload CSV datasets, query data using natural language, and receive dynamically generated analysis and insights.
- Built an automated analytics workflow for data quality assessment, duplicate removal, missing-value handling, and dynamic Plotly visualizations, with conversational context, AI-driven chart selection, and generated-code validation for interactive follow-up analysis.

Fraud Risk Analysis
Python (Pandas, NumPy), Excel (Pivot Tables, DAX), Power BI, Exploratory Data Analysis (EDA) Jan 2026

- Built an end-to-end Fraud Risk Analysis dashboard for 280K+ credit card transactions; performed cleaning, feature creation, and rate-based analysis to handle extreme class imbalance.
- Designed Power BI reports with DAX measures to surface high-risk segments, flagging 1,400+ suspicious transactions for operational monitoring and alerting.

EDUCATION

California State University, Los Angeles Aug 2023 – May 2025
Master of Science in Computer Science
Savitribai Phule Pune University, Pune Jul 2017 – Apr 2021
Bachelor of Engineering in Computer Engineering

CERTIFICATIONS & RECOGNITION

- Microsoft Certified: Azure Fundamentals
