PROFESSIONAL SUMMARY

Data Engineer with **3+ years** of experience building **ETL** pipelines using **Python, SQL, PySpark, and AWS**. Experience processing **100+ GB** of daily data, developing **Redshift** dimensional models and Delta Lake medallion pipelines, and implementing automated data validation and **CI/CD workflows**. Reduced pipeline execution time by 40% through **Spark** optimization and SQL query tuning.

EXPERIENCE

National Hispanic Health Research Institute **Feb 2026 – Jul 2026**
Data Engineer *Hartford, CT*

- Integrated CDC, U.S. Census, and federal public health datasets into **Amazon Redshift**, improving data quality by **30%** through automated schema validation, deduplication, and standardized date and location formats.
- Automated cleaning and standardization of **200,000+ public health records** using **Python and SQL**, reducing manual data preparation time by 35% through consistent column types, missing-value handling, and unified join keys.
- Designed pre-aggregated star-schema fact and dimension tables spanning 6 years of public health data in Amazon Redshift, powering **Power BI dashboards** and reducing executive **reporting turnaround time by 45%.**

Chicago Education Advocacy Cooperative **Aug 2025 – Jan 2026**
Data Engineer *Chicago, IL*

- Engineered **Bronze–Silver–Gold medallion architecture** using **PySpark, SQL, and Delta Lake** to transform **9,000 customer records** into validated, analytics-ready datasets through automated ETL pipelines and data quality checks.
- Built Gold-layer analytical data marts for churn segmentation, customer value, and retention analysis across 4 membership tiers, calculating a **19.73% churn rate** and customer retention **KPIs**.
- Containerized data processing workflows using **Docker and implemented GitHub Actions CI/CD** to automate pipeline testing and validation.

California State University, Los Angeles **Aug 2024 – Dec 2024**
Data Developer *Los Angeles, CA*

- Assisted with cleaning, validating, and organizing departmental data using **SQL, Python, and Excel** for reporting needs.
- Supported simple **ETL** workflows by extracting data from multiple files/sources, applying transformations, and preparing structured datasets for departmental reporting.

Abzooba India Infotech Pvt. Ltd. **Jun 2021 – Jun 2023**
Big Data Developer *Pune, India*

- Designed and scaled production **ETL pipelines** using **AWS Glue, PySpark, Amazon S3, Athena, and SQL** to transform **100+ GB** of daily semi-structured JSON healthcare data into analytical tables.
- Reduced pipeline execution time by **40% through Spark job optimization**, SQL query tuning, and distributed processing improvements.
- Increased **data accuracy by 25%** through automated validation, root-cause analysis, and transformation logic fixes, collaborating with engineering and business teams to define data requirements.

SKILLS

- **Programming Languages:** Python, SQL, Bash
- **Data Engineering & Modeling:** ETL/ELT, Data Ingestion, Data Quality Validation, Schema Design, Data Warehousing, Dimensional Modeling, Star Schema, Medallion Architecture
- **Big Data & Transformation:** Apache Spark, PySpark, Delta Lake, Databricks, dbt
- **Cloud Platforms:** AWS (Glue, S3, Athena, Redshift, RDS, Lambda), Google BigQuery
- **Development & DevOps:** Git, Docker, GitHub Actions, CI/CD, Unit Testing
- **Databases & BI:** PostgreSQL, MySQL, Tableau, Power BI
- **AI Integration:** LLM Integration, Groq API

PROJECTS

InsightAI – AI-Powered Data Analyst Agent
Python, Generative AI, Groq API, Pandas, Streamlit, Plotly

- Built a conversational analytics application using Streamlit and **the Groq API**, enabling natural-language **SQL and Pandas** querying over uploaded datasets.
- Automated exploratory data analysis with data sanitization, Plotly chart selection, and code validation for **LLM-generated** analysis.

Fraud Risk Analysis
Python, SQL, Batch Data Processing

- Developed a batch data pipeline to process **280,000+ financial transaction** records, applying feature normalization and aggregation to prepare inputs for fraud risk models.
- Implemented data validation rules for a transaction dataset with a **fraud rate below 0.2%,** preparing consistent datasets for downstream analysis.

EDUCATION

California State University, Los Angeles **Aug 2023 – May 2025**
Master of Science in Computer Science

Savitribai Phule Pune University, Pune **Jul 2017 – Apr 2021**
Bachelor of Engineering in Computer Engineering

CERTIFICATIONS & RECOGNITION

- Microsoft Certified: Azure Fundamentals
