PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience in healthcare analytics and data engineering. Skilled in SQL, Python, Tableau, Power BI, ETL pipelines, and AWS. Improved data processing by 40%, increased data quality by 25%, and identified $310K in revenue at risk through customer segmentation to support data-driven business decisions.

SKILLS

- **Programming Languages:** SQL, Python (Pandas, NumPy, Matplotlib, Seaborn, scikit-learn)
- **Data Analysis:** Excel, Tableau, Power BI, EDA, Statistical Analysis
- **Databases:** PostgreSQL, MySQL, BigQuery
- **Data Engineering:** ETL/ELT, PySpark, Apache Spark, AWS (S3, Glue, RDS, OpenSearch), Microsoft Azure, Google Cloud Platform
- **Tools:** Git, Jupyter
- **AI:** LLM Integration, Prompt Engineering, Groq API

EXPERIENCE

National Hispanic Health Research Institute (NHHRI) **Feb 2026 – Jul 2026**
Data Analyst *Hartford, CT (Remote)*

- Collected, cleaned, and integrated healthcare datasets from U.S. Census, CDC, and federal sources across 51 states using Python, SQL, and Excel, improving data quality by ~30%.
- Processed and standardized 200K+ healthcare records on chronic conditions and demographic indicators, reducing manual data preparation by 35% and improving reporting accuracy.
- Built interactive Tableau dashboards to visualize healthcare and demographic trends across 6 years of data, enabling state-level analysis and accelerating stakeholder decision-making by 45%.

Chicago Education Advocacy Cooperative (ChiEAC) **Aug 2025 – Jul 2026**
Data Analyst *Chicago, IL (Remote)*

- Analyzed customer churn behavior using Python-based KPI calculations, identifying a 19.7% churn rate and pinpointing bronze and silver tiers as highest-risk customer segments.
- Quantified $310K in revenue at risk by segmenting high-risk customers using service risk and customer value metrics, enabling targeted retention strategy recommendations.
- Developed KPI dashboards that translated customer behavior data into actionable retention insights for business stakeholders.

Abzooba India Infotech Pvt. Ltd. **Jun 2021 – Jun 2023**
Big Data and Cloud Developer *Pune, India*

- Designed and maintained ETL/ELT pipelines processing 100+ GB of nested healthcare JSON data daily, transforming raw data into structured datasets using Python, SQL, and PySpark.
- Improved data accuracy by 25% through root-cause analysis and validation of data transformation logic, ensuring reliable data for analytics.
- Reduced pipeline processing time by up to 40% by optimizing Apache Spark jobs, minimizing data shuffling, and improving distributed data transformations.
- Translated complex stakeholder requirements into PySpark data transformation logic; collaborated with QA and API teams to validate data quality against business specifications.

PROJECTS

InsightAI – AI-Powered Data Analyst Agent
Python, Generative AI, Groq API, Pandas, Streamlit, Plotly *Jul 2026*

- Developed an AI-powered data analytics application using Python, Groq LLM API, and Streamlit, enabling users to upload CSV files, query data in natural language, and generate automated insights.
- Built an automated data analysis workflow with data cleaning, missing-value handling, duplicate detection, and dynamic Plotly visualizations, reducing manual analysis and improving data exploration.

Fraud Risk Analysis
Python (Pandas, NumPy), Excel (Pivot Tables, DAX), Power BI, Exploratory Data Analysis (EDA) *Jan 2026*

- Built an end-to-end Fraud Risk Analysis dashboard for 280K+ credit card transactions; performed cleaning, feature creation, and rate-based analysis to handle extreme class imbalance.
- Designed Power BI reports with DAX measures to surface high-risk segments, flagging 1,400+ suspicious transactions for operational monitoring and alerting.

Crime Data Analysis & Visualization
Python (Pandas, NumPy), SQL, Tableau, Exploratory Data Analysis (EDA) *Dec 2025*

- Cleaned, standardized, and analyzed 1M+ LAPD crime records using Python and SQL, improving data quality by 25% through data preprocessing and schema normalization.
- Built interactive Tableau dashboards with geospatial and time-series visualizations to identify crime hotspots and seasonal trends, enabling data-driven public safety analysis.

EDUCATION

California State University, Los Angeles **Aug 2023 – May 2025**
Master of Science in Computer Science

Savitribai Phule Pune University, Pune **Jul 2017 – Apr 2021**
Bachelor of Engineering in Computer Engineering

CERTIFICATIONS & RECOGNITION

- Microsoft Certified: Azure Fundamentals
